Allowable Subject Matter

1. Claims 1-13 are allowed.

The following is an examiner's statement of reasons for allowance:

2. Claim 1 is allowable over the prior art of record since the cited references taken individually or in combination fail to particularly teach or fairly suggest a remote station comprising a differential analyzer for generating a differential quality metric, wherein the quality metric and the differential quality metric are to be transmitted to a base station to indicate link quality. It is noted that the closest prior art of a record, Laakso et al, shows the mobile station comparing the measured SNR value with the target value and sends a power control command on the basis of the result obtained in this comparison. However, Laakso et al fail to suggest transmitting the quality metric and the differential quality metric to the base station as required by the claimed invention.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - US 2003/0099209 Laakso et al
 - US 20020016177 Miya et al
